National Data Governance & Classification Charter

Mandatory Regulatory Framework for Public Sector Data Management in Iraq

CHARTER METADATA:

â¢ Document Reference: IDG-GOV-DATA-2026
â¢ Classification: SOVEREIGN REGULATORY CHARTER
â¢ Effective Date: October 2026
â¢ Jurisdiction: Republic of Iraq (Federal & Regional Agencies)

1. The Four-Tier Data Classification Matrix

All institutional and governmental data is formally categorized into four strict tiers:
â¢ Tier 1 (Public / ÙÙØ²ÙØ©): Public legislation, statistical aggregates, educational materials.
â¢ Tier 2 (Confidential / Ø³Ø±Ù): Inter-agency correspondence, non-critical commercial filings.
â¢ Tier 3 (Sovereign Critical / Ø³ÙØ§Ø¯Ù Ø³ÙØ§Ø¯Ù): Port manifests, tax revenue, banking RTGS logs.
â¢ Tier 4 (Air-Gapped Sovereign / Ø³ÙØ§Ø¯Ù ÙÙØ·Ù): National civil registry, defense telemetry.

2. Absolute Prohibition on Cross-Border Data Leakage

Under Section 4.2 of this Charter, any cloud architecture routing Tier 3 or Tier 4 records through foreign proxy servers, CDNs, or offshore databases constitutes a sovereign breach. All AI models trained on Iraqi institutional data must execute within sovereign nodes.

3. Accountable Ownership & Evidentiary Chains

Every electronic registry and transactional pipeline must designate an Accountable Owner. The Accountable Owner bears personal operational and legal responsibility for data integrity, access controls, and disaster recovery readiness under IDG governance KPIs.

4. Cryptographic Hashing & Immutability Standards

To eliminate retro-active database tampering and corruption:
â¢ All record modifications must generate an immutable SHA-256 digest block.
â¢ Cryptographic audit chains must be inspectable by the Supreme Board of Auditing.
â¢ Retention periods for financial and customs logs are permanently set to 15 years minimum.

5. Regulatory Sanctions & Compliance Oversight

Non-compliance with this charter results in immediate revocation of sovereign gateway access and referral to the Federal Integrity Commission for institutional malpractice investigation.

RATIFICATION & ADOPTION SEAL:

[SEALED] High Committee for National Digital Transformation - Prime Minister’s Office
[CERTIFIED] Institutional Relations & Sovereign Governance Desk - IDG Group
